Exam Tips
- To give you the best chance at getting the highest mark, you need to plan your strategy to get through ALL THE QUESTIONS!
- This may include:
 1. If you cannot answer a question in 30 seconds then move on with the plan of having about 15-20 minutes at the end to go back to unanswered ones.
 2. Use elimination: Scan all the answer options the ask yourself "What answers are obviously wrong?" Ideally narrow the choice to between two questions, then try and recall your learnings from your preparation for the exam.[Take the exam here](#)
